Colonia del Sacramento Tours

A testimony from the Past

A Unesco World Heritage

Born from the portuguese's will on the margins of the Río de la Plata river, built of wood and stone, it arose the Nova Colonia Do Santissimo Sacramento.

It was a point of controversy between the portuguese and spanish crowns, that left its mark of his past in its architecture and streets. The mix of countryside, beaches and river gives to this place a natural setting that combines with history.
